Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Saturday 06 Feb 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Becoming much colder with rain turning to snow.

Today:
A cloudy day for most with rain, occasionally heavy. This most widespread in the east and driest in the northwest. The rain will increasingly fall as snow, including to lower elevations, as it turns colder later in the day. Maximum temperature 7 deg C (45 deg F).

Tonight:
Rain and snow easing through the evening and overnight, becoming dry for most, though further snow showers likely in Pennine areas. Temperatures falling to around freezing, leading to some ice. Minimum temperature -1 deg C (30 deg F).

Sunday:
Cloud starting to break up, giving some sunny spells, but scattered showers remain, especially in the east. Mostly wintry, rarely heavy. Cold, especially east, with widespread frost and ice. Maximum temperature 2 deg C (36 deg F).

Outlook for Monday to Wednesday:
Mostly sunny with scattered snowy showers on Monday, Tuesday and Wednesday. Very cold with risk of frost and ice.
